

# BDZ WhitePaper – V2

# Introduction

- MemeCoins are launched everyday, but they aren't necessarily safe.
- Many had been a victim of rugpulls, scam and pump and dumps. We were a victim before too and we have survived the impact!
- Our community still stands strong, spanning every continent across the globe. They hold tightly with diamond hands and vow to make the project stronger and the crypto verse safer!

BabyDogeZilla is a spin-off from the DogeZilla hype.

We forked their contract and did a small presale.

Communally we have even defined ourselves well beyond a meme coin and collectively given ourselves an amazing use case.

Our driven and dedicated community have helped rebranding our image including designing the new logo.

### Tokenomics

Total supply: 69,000,000,000,000,000,000,000

8% of total tax | 3% are reflected back to holders | 5% going to LP | max TX 2%
